

Eve grows up in a post-apocalyptic dystopian world which has been ravaged by the GBWs (Great Bacterial Wars). She slowly finds out that not all is perfect within the protected colony wherein she lives separated from the outsiders known as the fallen. She questions the very foundations of the society by asking questions about her mother, who she has never known because she is not a chosen one, as Eve is, but a fallen from the other side of the great wall that surrounds the colony. This shocks her father and the leaders of the colony. Eve learns quickly that the less questions asked the better. Then, everything swirls out of control as Eve suddenly finds herself shut out of the colony amid the crumble and chaos of a new outside world. She discovers a whole other reality as she starts to live amongst the fallen ones. She quickly realises that the colony hides unimaginable ugly lies and injustice and decides to fight back by joining the fallen resistance. However, Eve carries within her DNA a unique gene, a miraculous remedy, that the members of the colony want desperately to study and recreate. She must fight, flee and hide to survive, struggling to find her own identity, amid her old beliefs and her newly found truths.
